

CONCLUSION

The eMain USA charrette addressed the multiple issues that were identified in the visioning session.

In the future, the eMain USA district will no longer be a forgotten area on the edge of downtown or a place to simply drive through on the way to West Main Street and the downtown core. With the new and popular Waterfront Park, Louisville Slugger Field, the expansion of the Convention Center, Medical Center development, and the proposed X-treme

Games Park, eMain USA is already a destination.

This district shall provide for a diversity of uses from high-tech to convenience uses that support e-business and residential developments alike. Evenings will bring Main Street to life, filling sidewalks with sports fans, restaurant and club goers, e-business owners and employees, conventioners, and residents 24 hours a day, 7 days a week, and 52 weeks a year.
